HARUN ERKAM BALI

Full Stack Developer | DevOps Engineer | R&D Engineer

Türkiye | Open to Remote • +90 539 569 28 75 • admin@harunerkam.com • harunerkam.com • linkedin.com/in/harunerkam • github.com/erkamspyjamas

PROFESSIONAL SUMMARY

Backend-focused Full Stack Developer, DevOps Engineer and R&D Engineer with 3+ years of experience designing, building and operating production software end-to-end. Strong across Django, FastAPI, Go, PostgreSQL, Redis and Node.js/Express.js, with hands-on ownership of Docker/Kubernetes infrastructure, CI/CD, Nginx, SSL/TLS, monitoring and production deployments. Experienced with authentication, payments, invoices, automation workflows, real-time services, AI/TTS integrations and performance-oriented backend design.

CORE TECHNICAL SKILLS

Languages: Python, Go, TypeScript, JavaScript, C#, SQL

Backend: Django, Django REST Framework, FastAPI, Node.js, Express.js, NestJS, REST APIs, JWT, RBAC, async/background processing

Frontend: React, Next.js, HTML, CSS, responsive interfaces, dashboard/admin UI integration

Data: PostgreSQL, MySQL, MSSQL, MongoDB, Redis, Firebase, relational modeling, migrations, indexing, query optimization

DevOps & Infrastructure: Docker, Docker Compose, Kubernetes/k3s, Nginx, Traefik, PgBouncer, Gunicorn/Uvicorn, Linux, GitHub Actions, CI/CD, SSL/TLS, health/readiness checks, logging and monitoring

Cloud & R&D: AWS EC2, Azure App Services, PyTorch, NVIDIA NeMo, ESPnet, VITS, TTS pipelines, streaming gateways, API/service integration

PROFESSIONAL EXPERIENCE

Full Stack Developer & DevOps Engineer - R&D

Aug 2026 - Present

Neurosound Dikkat Ve Algı Geliştirme Merkezi | Türkiye

- Work on R&D-focused software systems combining backend development, distributed systems, infrastructure, real-time communication and applied AI technologies.
- Design prototypes and scalable architectures using Django, FastAPI, Go, PostgreSQL and Redis; integrate AI/TTS, streaming and external-service pipelines.
- Evaluate system performance, reliability and scalability across application, data and infrastructure layers.

Full Stack Developer & DevOps Engineer

Aug 2024 - Aug 2026

Neurosound Dikkat Ve Algı Geliştirme Merkezi | Türkiye

- Developed production full-stack applications, backend services, REST APIs and internal systems using Django, FastAPI, Express.js, Node.js and Go.
- Worked with PostgreSQL and Redis for relational data, caching and application performance; optimized SQL/ORM queries, indexes and connection-pooling patterns.
- Managed Docker and k3s/Kubernetes environments, CI/CD pipelines, Nginx, PgBouncer, SSL/TLS, ingress, health/readiness checks, logging, monitoring and automated deployments.
- Operated Django, Node.js, Go, PostgreSQL and Redis-based services and contributed to infrastructure performance and production reliability.

Full Stack Developer

Feb 2024 - Aug 2024

Neurosound Dikkat Ve Algı Geliştirme Merkezi | Türkiye

- Developed full-stack web applications using Django, FastAPI, Express.js and modern frontend technologies.
- Built REST APIs, authentication systems, automation tools, internal services and third-party integrations.
- Designed relational models, optimized SQL and ORM queries, and developed reusable backend modules with PostgreSQL and Redis.

Software Developer

Nov 2023 - Feb 2024

Neurosound Dikkat Ve Algı Geliştirme Merkezi | Türkiye

- Developed an interactive educational application using Unity and C#, including application flows, UI, interactive learning modules and reusable components.
- Worked on application logic, data handling, debugging, testing and performance improvements while translating educational requirements into digital experiences.

EARLIER EXPERIENCE

Research & Development Engineer **Feb 2023 - Jun 2023**

AutoDidactic Technologies | Konya, Türkiye

- Built Python and Node.js prototypes for AI/R&D experiments and supported reproducible data-processing and reporting workflows.
- Supported Docker-based development, Linux administration, AWS EC2 deployments and automation scripts.
- Contributed to reinforcement-learning and experimental software work with an emphasis on rapid iteration and technical reporting.

SELECTED PROJECTS

Sustindex: FinTech platform developed independently with Django, FastAPI, React and PostgreSQL; architecture and selected implementation details available on request.

Stock & Device Tracker: Inventory, cargo and device-tracking system implemented in Node.js/Express.js with Firebase and MSSQL variants.

Cognitive Booster: Django and JavaScript web application for cognitive-performance exercises, user progress and related workflows.

Speed Reading Platform: High-performance PHP/MySQL reading application extended and optimized for education users.

Advanced Learning Unity Program: Unity/C# educational application for power learners, combining interactive application logic with learning-oriented UX.

Realtime TTS / AI Service Integration: Integrated Python-based TTS workers and Go/Python service layers with application backends, focusing on low-latency communication, retries, timeouts and production reliability.

EDUCATION

B.Sc., Management Information Systems - Necmettin Erbakan University

2019 - 2023 | GPA: 3.11 / 4.00

CERTIFICATIONS

- EF SET English Certificate - 65/100 (C1 Advanced)
- Aygaz Machine Learning Bootcamp

LANGUAGES

Turkish: Native | English: C1 (EF SET 65/100)

Selected repositories and production systems are private; architecture overviews, code excerpts or access can be shared when appropriate.
