HARUN ERKAM BALI

Full Stack Developer | Django | FastAPI | React | Node.js

Türkiye | Open to Remote • +90 539 569 28 75 • admin@harunerkam.com • harunerkam.com • linkedin.com/in/harunerkam • github.com/erkamspyjamas

PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years of experience building and operating production web applications end-to-end. Experienced across Django, FastAPI, Node.js/Express.js, React/Next.js, Go, PostgreSQL and Redis, from relational data modeling and API design to user-facing interfaces and internal tools. Hands-on with authentication, dashboards, billing-related workflows, automation, third-party integrations and real-time/AI service integration. Also brings production ownership through Docker, Kubernetes/k3s, Nginx, CI/CD, monitoring and deployment automation.

CORE TECHNICAL SKILLS

Frontend: React, Next.js, JavaScript, TypeScript, HTML, CSS, responsive UI, dashboard/admin interfaces, API integration

Backend: Python, Go, Django, Django REST Framework, FastAPI, Node.js, Express.js, NestJS, REST APIs, JWT/session auth, RBAC

Data & Application Services: PostgreSQL, Redis, MySQL, MSSQL, MongoDB, Firebase, relational modeling, migrations, indexing, caching, query/ORM optimization

Full-Stack Product Work: Authentication, user/session flows, analytics, content/media handling, forms, admin tools, billing-related workflows, third-party integrations, automation

DevOps & Production: Docker, Docker Compose, Kubernetes/k3s, Nginx, Traefik, PgBouncer, Gunicorn/Uvicorn, Linux, GitHub Actions, CI/CD, SSL/TLS, health/readiness checks, logging and monitoring

R&D / AI Integration: PyTorch, NVIDIA NeMo, ESPnet, VITS, TTS pipelines, streaming gateways, real-time service integration

PROFESSIONAL EXPERIENCE

Full Stack Developer & DevOps Engineer - R&D
Aug 2026 - Present

Neurosound Dikkat Ve Algı Geliştirme Merkezi | Türkiye

- Design and prototype full-stack R&D systems combining Django/FastAPI and Go services with PostgreSQL, Redis, real-time communication and applied AI integrations.
- Build application and service flows that connect product-facing features with AI/TTS, streaming and external platforms while evaluating performance, reliability and scalability.
- Contribute across architecture, backend implementation, integration work and production infrastructure for new product capabilities.

Full Stack Developer & DevOps Engineer
Aug 2024 - Aug 2026

Neurosound Dikkat Ve Algı Geliştirme Merkezi | Türkiye

- Developed and maintained full-stack applications, backend services, REST APIs and internal tools using Django, FastAPI, Express.js/Node.js, Go and web frontends.
- Built authentication, user/session flows, analytics, content/media handling, administrative interfaces, integrations and billing-related application workflows.
- Designed PostgreSQL data models and optimized SQL/ORM queries, indexes and Redis caching while integrating frontend applications with backend APIs.
- Owned production delivery with Docker, k3s/Kubernetes, Nginx, PgBouncer, CI/CD, SSL/TLS, ingress, health/readiness checks, logging and monitoring.

Full Stack Developer
Feb 2024 - Aug 2024

Neurosound Dikkat Ve Algı Geliştirme Merkezi | Türkiye

- Developed full-stack web applications using Django, FastAPI, Express.js and modern frontend technologies, with REST APIs consumed by user-facing and internal interfaces.
- Built authentication systems, automation tools, internal services and third-party integrations; designed relational models and reusable application modules.
- Worked extensively with PostgreSQL and Redis and improved SQL/ORM access patterns, caching and operational workflows.

Software Developer
Nov 2023 - Feb 2024

Neurosound Dikkat Ve Algı Geliştirme Merkezi | Türkiye

- Developed an interactive educational application using Unity and C#, including application flows, UI, interactive learning modules and reusable components.
- Worked on application logic, data handling, debugging, testing and performance improvements while translating educational requirements into digital experiences.

EARLIER EXPERIENCE

Research & Development Engineer **Feb 2023 - Jun 2023**

AutoDidactic Technologies | Konya, Türkiye

- Contributed to full-stack and R&D prototypes using Python, Node.js/Express.js, Electron, Java, Unity/C# and SQL databases.
- Supported Dockerized workflows, Linux administration and AWS EC2 deployments for experimental projects.
- Prepared utilities for data processing, reporting and reproducible experimentation in AI/reinforcement-learning contexts.

SELECTED FULL-STACK PROJECTS

Sustindex: FinTech platform developed independently with Django, FastAPI, React and PostgreSQL, covering backend APIs, relational data, frontend integration and production-oriented architecture.

Stock & Device Tracker: Inventory, cargo and device-tracking application implemented in Node.js/Express.js with Firebase and MSSQL variants, combining operational workflows with web interfaces.

Cognitive Booster: Django and JavaScript web application for cognitive-performance exercises, progress tracking and user-facing workflows.

Speed Reading Platform: High-performance PHP/MySQL reading application extended and optimized for education users, including product and data-flow improvements.

Advanced Learning Unity Program: Unity/C# educational application for power learners, combining interactive application logic with learning-oriented UX.

Realtime TTS / AI Product Integration: Connected application backends and product flows with Python TTS workers and Go/Python service layers, focusing on low-latency communication and reliable integration.

EDUCATION

B.Sc., Management Information Systems - Necmettin Erbakan University

2019 - 2023 | GPA: 3.11 / 4.00

CERTIFICATIONS

- EF SET English Certificate - 65/100 (C1 Advanced)
- Aygaz Machine Learning Bootcamp

LANGUAGES

Turkish: Native | English: C1 (EF SET 65/100)

Selected repositories and production systems are private; architecture overviews, code excerpts or access can be shared when appropriate.
